

AIRZONE

Next generation cushion technology

“ Patient had Grade 3 pressure sores on right thigh. Tried an active cushion but found it was too thick and caused pressure on back of thighs when transferring

She has found the Airzone comfortable and very successful. Sores have healed.”

Clinical Trial Jan/Feb 2008

- **A static cushion that thinks its active** – clinical effectiveness for patients at risk of and with existing pressure sore damage
- **Heavy duty yet lightweight** – available in 2"/50mm depth and accommodating up to 25 stone/159kg – but the cushion weighs less than 0.9 lbs/410gms
- **Low profile** – facilitating easier patient/self transferring
- **Additional postural support adaptations** – to help address more complex seating needs
- **Enormous size flexibility** – to accommodate range of community and domestic seating arrangements

Client profile:

- Clients at risk of and with existing pressure sore damage
- Less mobile, heavier clients, up to 25 stone/159kg
- Suitable for use in wheelchairs
- Elderly and frail
- Hospital and community based care settings
